📄 PROFILE

I'm a passionate **Flutter Developer** with experience in building **cross-platform mobile applications** using **Flutter and Dart**. I have hands-on experience developing **responsive UI**, integrating **REST APIs**, implementing **authentication**, and working with **Firestore, maps, payments, and notifications**. I also have experience with **Node.js, Express.js, and PostgreSQL** for backend development. I enjoy **learning new technologies, solving technical problems**, and building **scalable and user-friendly applications**.

🎓 EDUCATION

SSC

R N Naik High School
2019 – 2020 | Surat, India

ITI

Government Industrial Training Institute (ITI), Surat
2021 – 2023 | Surat, India

📖 COURSES

Flutter Developer

Red And White Skill Education
2023 – 2025 | Surat, India

Web Development Course

Red And White Skill Education
2025 – 2026 | Surat, India

🧠 SKILLS

Programming Languages

- Dart
- JavaScript

Framework

- Flutter
- Node.js Express

Databases

- Firestore (Firestore)
- PostgreSQL (PSQL)
- MongoDB
- SQLite & Shared Preferences (SP)

Tools & Platforms

- Git & GitHub
- VS Code
- Android Studio
- Antigravity IDE
- Node Package Manager (NPM)

👜 PROFESSIONAL EXPERIENCE

Internship

Flutter Developer Intern
Bigscal Technologies Pvt. Ltd.

- Assisted in developing Flutter applications and implementing UI designs.
- Worked with APIs, Firestore, and state management solutions.
- Participated in debugging, testing, and feature development.
- Gained hands-on experience in mobile application development.

07/2025 – 12/2025
Surat, India

Flutter Developer

Bigscal Technologies Pvt. Ltd.

01/2026 – Present
Surat, India

- Developed and maintained Flutter applications for mobile and tablet platforms.
- Integrated REST APIs, payment gateways, and real-time socket communication.
- Collaborated with cross-functional teams to deliver scalable solutions.
- Worked with Flutter, React.js, .NET APIs, and native Android integrations.

LIVE PROJECTS

GIFT Utility

- **Project Description :**
- Developed a utility management system using **Flutter** for mobile applications, **React.js** for the web portal, and **.NET Web API** for backend services.
- Implemented online application workflows for **Power, District Cooling System (DCS), Water, Sewage, and Solid Waste** utility connections.
- Built secure authentication and role-based access control for both citizens and administrators.
- Developed an admin dashboard to review, approve, reject, and manage utility connection requests and customer information.
- Integrated REST APIs for real-time data management, application status tracking, and seamless communication between mobile, web, and backend systems.

Technologies Used: Flutter, React.js, .NET Web API, REST API, SQL Server, Git/GitHub, Postman

Hotel Tap-to-Pay Payment App

- **Project Description:**
- Developed a hotel payment application using **Flutter** with support for **Tap-to-Pay** transactions through the **Adyen Payment Gateway**.
- Integrated a **React.js** web application within Flutter using WebView and implemented communication between Flutter and React through a bridge mechanism.
- Developed native Android Tap-to-Pay functionality in **Kotlin** and connected it to Flutter using **Platform Channels**.
- Implemented secure contactless payment processing, enabling customers to complete transactions directly from NFC-enabled devices.
- Collaborated on end-to-end payment workflows, ensuring seamless integration between Flutter, React.js, Kotlin, and Adyen services.

Technologies Used: Flutter, Dart, React.js, Kotlin, Adyen Tap-to-Pay, WebView, REST API, Git/GitHub, NFC

Smart Locker Management System

- **Project Description :**
- Developed a tablet-based locker management application for hotels using **Flutter**, enabling staff to securely open and lock lockers.
- Implemented **Socket Communication** for real-time connectivity and instant locker status updates.
- Built features to manage locker access based on operational workflows, ensuring secure and efficient locker control.
- Implemented **Kiosk Mode** to restrict device usage, automatically relaunching the application after device restarts and preventing unauthorized access to other applications.
- Designed the application to run as a dedicated business solution with controlled navigation and restricted app exit functionality.

Technologies Used: Flutter, Dart, Socket Programming, Android Kiosk Mode, REST API, Git/GitHub
